Forecast for Tuesday 07 Feb 2023

Weather: Occasional mist and freezing fog patches at first in valleys, slowly lifting and breaking. These are likely to re-form again during the evening. Otherwise, a dry and bright day with sunny spells.

Chance of cloud-free hill tops above 600m: 90%

Low cloud and visibility: Mist and fog patches in valleys giving poor or very poor visibility, both early and late in the day. This may give some brief visibility deteriorations as fog lifts during the morning, otherwise no significant cloud. Visibility good or very good, except in any mist and freezing fog.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Due to cold air pooling in valleys, freezing level will reach the surface at lower levels early morning and late evening.

Recent rainfall: measured at Neuadd: altitude 353m

03:00 on Tue 07 Feb 2023	0mm	0.2mm	0.6mm

Forecast for Wednesday 08 Feb 2023

Weather: Some early mist and freezing fog possible, otherwise dry and bright with freshening southwest winds. Cloud thickening a little later.

Maximum wind: South or Southwest 20-25mph gusts 30-35mph during the afternoon and evening.

Chance of cloud-free hill tops 600m: 80%

Low cloud and visibility: Mist and fog patches in valleys giving poor or very poor visibility at first. This may give some brief visibility deteriorations as fog lifts during the morning. Occasional cloud developing above around 600m late in the afternoon. Visibility mostly good or very good, but very poor in any morning fog and cloud covering the hills later.

Temperature: **Valleys:** Minus 2 Celsius rising to 7 Celsius
At 600m: Around Zero Celsius
Freezing level: Most levels at first in early frost, rising 600 to 800m.
